Total Sample Management & Workflow Solution for

Quality Control, R&D, Professional, Commercial Analytical Testing Laboratories

KRITI LIMS is an Integrated Resource Management Software, Designed and Developed for Laboratory Information and Process Management Applications. KRITI LIMS takes care of Total Workflow Automation Activities of Testing Labs. The solution covers Laboratories Functions and Procedures. Like Sample Submission, Sample Scheduling, Registration, Lab coding, Worksheet Generation, Job Allocation, Testing, Quality Control, R&D, Test Result Approval, Test Report Printing, Billing, Proforma Invoice preparation Statements, Reports, MIS Business Intelligence etc.

KRITI LIMS enables Laboratories to move towards paperless office and Comply with Regulatory requirements. KRITI LIMS has facility to be Customized and Implemented in any sized Testing Laboratory environments. The Solution covers laboratory Operations, Administration and Revenue Management. Laboratory Workflow, Quality Management, Assets Management, CRM and Business Intelligence functions. Customized versions are available for more than 35 industry Verticals. Kriti LIMS complies to CFR 21 Part-11, GLP, ISO 17025, ISO 15189 etc

Kriti LIMS CRM is add-on module towards Assets Management, Customer and Resources Management, Online Test Certificate Distribution and verification systems.

KRITI LIMS Lab Process Automation System is a full-featured web based or Client/Server based Laboratory Information Management System. Integrated into Windows environment capable to adapt to any Analytical Testing Lab requirements. KRITI LIMS supports scaleable Architecture on Cloud, Internet or Intranet facilitating Global or Decentralized, departmental Installations. Customisation facility to interface with various Lab. Instruments, Office Tools Applications (ERP, SAP, etc.)

KRITI LIMS Lab Process Automation System is operational in both highly regulated and non-regulated environments and meets all functional requirements by providing full Sample Tracking (Acceptance to the delivery of Results) related Process, Dataflow, Workflow, Record Maintenance, Statements, Books of Accounts, and Correspondence etc. LIMS is fully validatable, with the help of Protocols specially designed for easy and speedy completion Installation Qualification, Operational Qualification and Performance Qualification tasks and suitable for Indian laboratory conditions and practices

KRITI LIMS allows laboratories to trace and track samples or specimens received at the Laboratory, Tests Performed, Methods Utilized, their Results, Authentication Control Limits, QC values, Deviation Notes etc. Sample status, Invoice , Performa Invoice Printing, Pseudo Sample Number generation, Service Tax Returns, Sample Scheduling, Result Data Entry, QA/QC, Electronic Data Entry, Result Printing etc.

Kriti LIMS CRM is an add-on Software tool to manage total functional aspects of Customer Relationship Applications and improve efficiency of Laboratories. KRITI CRM enables to win and retain Customers in the competitive Business environment through efficient Management of Support, Services, Sales, Public Relations, Accounts Receivable, Office Administration and Order Management Functions. **Kriti LIMS DMS** is an Online Document Management System permits you to manage the distribution and administration of Documents and Records in an effective manner. By enabling access to Information and Records on multiple Dimensions by connecting Customers, Divisions, Subsidiaries, Regional Labs, Collection Centers and Entities to a Universally Accessible Central Web Server. The DMS enables to establish an online Test Certificate Distribution and Verification System with proper security and confidentiality towards increased Customer Satisfaction.

Advanced MIS Tools

Advanced MIS and Business Intelligence Tools facilitate to maintain MIS Repository. Data Transformation Tools of Kriti LIMS helps to convert Data to MS Excel, MS Word, PDF, HTML, and other user defined formats. KRITI LIMS has optional Modules for Advanced Data Management for Analytical Applications. Data Transformation Tool also helps to Import, Export e-mail, SMS Information etc

.
N.B: Modules configurable according to customer requirements.
