

Kriti LIMS- Food & Beverages

Laboratory Process and Workflow Automation Software for Food & Beverages Testing Laboratories

KRITI LIMS is an Integrated Software Suite for Food & Beverages Testing Laboratory Information and Process Management. KRITI LIMS is customised to meet the Total Process and Workflow Automation activities of Quality Control activities of Food & Beverages Testing Laboratories. The solution covers Laboratories Functions and Process like testing, Quality Control, R&D, Test Result Entry, Report Generation, Invoice, Billing, Statements, Reports, MIS, Preparation of Service Tax Returns etc.

Tests on different kinds of Packaged food, Agriculture produce, Beverages as per BIS, FPO, ISO and International standards are possible on the system.

Equipment Management Module: The Equipment Management Module facilitates Asset Management, calibration schedules and records. All Equipments, Instruments, Calibration schedules will be recorded and monitored.

Material Management Module: The Material Management Module enables registration of all chemicals and reagents. All types of consumption, Purchases etc will be tracked and stock positions updated all the time.

Application Interface Module: The Application Interface Module helps to Collect and Integrate information from ERP and SAP systems. The module permits to Import and Export data to ERP Systems.

The cost effective Implementation and Customisation makes it affordable for Small and Medium scale Food & Beverages Manufacturers, Health Authorities, Local Bodies, Marketing Companies, Food & Beverages Testing Authorities, Quality Control Departments and Professional Testing Laboratories, etc.
